

PRESS RELEASE

SFMI

SILVER FALCON MINING INC. (SFMI) PRECIOUS METAL BULLION DELIVERY, OPERATIONAL UPDATES.

Bradenton, FL.- (MARKET WIRE) – 05/06/13-- Silver Falcon Mining, Inc. (SFMI)) April delivery of 52 ounces of Precious Metal Bullion dore to its contract [refinery](#) in Florida bodes well for the Company's future. [Monthly, Dore produced](#) is stored in the secure vault within the confines of the Company's metallurgical building prior to deliveries to the refinery. The refinery converts dore into their determined Au (gold) and Ag (silver) values and adds the bullion count to the Company's bullion account. Management can either keep the bullion in this account and/or convert all or a portion into cash at their discretions. Cash conversions are determined by current commodity prices of Au and Ag. Since the onset of production, the Company has refined 592 oz. of precious metal dore.

Mr. Pierre Quilliam, CEO, Silver Falcon Mining, Inc., states, "Our ten cells [Denver Floatation Unit](#) has proven itself to be very effective, and reprocessing of the large amount of partially treated ore has begun. This valuable inventory, brought down from War Eagle in the last years, contains enough precious metal to enable the Company to compensate for the monies invested so far in the project."

Sinker Tunnel Gold Project

- Work inside the Sinker Tunnel goes on although at a slower rate while the Company awaits confirmation of its funding to further develop and prove the ore bodies which criss-crosses the tunnel at the 6,090 ft. mark from the entrance.

This past winter has proven the theory that the roads on the mountain leading to the Sinker tunnel, could be easily kept open with the Company's snow removal equipment, thus allowing the Company to mine the ore bodies and operate the Diamond Creek mill on a year-round basis .

Closed Circuit Leaching Unit

- The Company is in final negotiations toward a loan which will fully fund the building of the "[Leaching Unit](#)" which was [permitted by Owyhee County](#) almost a year ago. The planned GEKKO system will be a huge production addition to the mill as it will recuperate the almost totality of the millions of dollars in precious metals contained in the ore on site at the mill, the cost of which was previously expensed on the Company's published financial reports. With this new funding in place, management expects to be in full production in early 2014 provided its filing of an operation permit gets timely approvals at the various government levels.

PRESS RELEASE

SFMI

About Silver Falcon Mining, Inc.

SFMI has mineral rights to approximately 1,200 acres on War Eagle Mountain in southern Idaho; its Diamond Creek Mill is situated at the foot of War Eagle Mountain and is serviced by 6.2 miles of paved roads from State Highway 78. It maintains year round access to the Sinker Tunnel which will facilitate underground mining of the rich veins crisscrossing the mountain above it, and SFMI provides the area population with employment and service opportunities.
